

We promote the medical, biological,
chemical, and pharmaceutical sciences.

Lasting support for excellent science.

Exploration Grants for Independent Research Group Leaders

Programme objectives

With its Exploration Grants, the Boehringer Ingelheim Foundation aims to provide outstanding scientists doing basic research in biology, chemistry, or medicine with the opportunity to pursue new ideas or follow-up surprising findings at an early stage of their careers. Exploration Grants thus offer the freedom to undertake preparatory work necessary for initiating new research directions and to successfully apply for research funding e.g., from the DFG or ERC. The grants are not for projects that constitute a logical next step of your research. They are also not available for projects that are planned or in progress under other funding arrangements.

Extent of funding

You may apply for a one-off grant of up to 180,000 euros. The grant may be used for personnel and direct project costs (e.g., consumables, minor equipment) as needed. Applications for funds to provide the group leader with a salary, as well as for funds solely for the purpose of procuring equipment and/or consumables will not be considered. Should funding be granted, you will be required to start the project within 6 months of the date of the approval letter.

Conditions for applying

If you wish to apply, you must fulfil the following prerequisites:

- You must have been awarded your PhD less than 10 years prior to the application deadline, and you should have substantial international experience.
- Your research focuses on fundamental questions in the biological, medical, and chemical sciences. A clear link to the life sciences is required. The Foundation encourages applications which have the potential to provide novel important insights into fundamental processes. The Foundation does not, however, fund zoological research or systematic botany, for example.
- You have been leading an independent research group at an academic institution in Germany for at least 2 years.
- You have an outstanding publishing record and can demonstrate your scientific independence by being the last and/or corresponding author of at least one published original scientific article originating from your independent research group.
- Your proposed project offers the potential to initiate a new research direction in your laboratory.
- You must not have submitted, nor will you submit, an application for funding of this project to any other organization until the Foundation has made its decision.

What is not funded by Exploration Grants?

- Projects that merely represent a logical continuation or extension of your research programme.
- Exploration Grants are not aimed at scientists whose research groups are embedded in a department or a senior research group, and who are not independent of such entities. Instead, applicants must demonstrate scientific independence comparable to the status of group leaders in the Emmy Noether Programme of the Deutsche Forschungsgemeinschaft (DFG).

Selection procedure

The decision on whether to grant funds is made by the Executive Committee of the Boehringer Ingelheim Foundation on the basis of recommendations by the Foundation's Scientific Advisory Board and external peer-reviews. You can recommend potential reviewers and may also name (giving reasons) scientists to whom your proposal should not be presented for evaluation.

Questions about the programme?

Please contact Dr Sabine Löwer

The Boehringer Ingelheim Foundation

The Boehringer Ingelheim Foundation is an independent, non-profit organization committed to the promotion of the medical, biological, chemical, and pharmaceutical sciences. It was established in 1977 by Hubertus Liebrecht (1931–1991), a member of the shareholder family of the Boehringer Ingelheim company.

Through its funding programmes Exploration Grants, Plus 3, and Rise up!, the Foundation supports excellent scientists during critical stages of their independent careers. It also endows the internationally renowned Heinrich Wieland Prize as well as awards for up-and-coming scientists in Germany. In addition, the Foundation funds institutional projects in Germany, such as the Institute of Molecular Biology (IMB), the department of life sciences at the University of Mainz, and the European Molecular Biology Laboratory (EMBL) in Heidelberg.

Executive Committee of the Foundation

Christoph Boehringer (Chairman)
Entrepreneur, Ingelheim

Prof. Dr Franz-Ulrich Hartl
*Max Planck Institute of Biochemistry,
Martinsried*

Dr Dr Michel Pairet,
*Member of the Shareholders' Committee, C.H.
Boehringer Sohn AG & Co. KG, Ingelheim*

Prof. Dr Jan-Michael Peters
*Research Institute of Molecular Pathology
(IMP), Vienna, Austria*

Otto Boehringer (Honorary Chairman)
Mainz

Scientific Advisory Board

Prof. Dr Ivan Dikic
*Institute of Biochemistry II, Medical Faculty of
Goethe University Frankfurt*

Dr Dr Michel Pairet,
*Member of the Shareholders' Committee, C.H.
Boehringer Sohn AG & Co. KG, Ingelheim*

Prof. Dr Britta Siegmund,
*Division of Gastroenterology, Infectiology und
Rheumatology, Charité - Universitätsmedizin, Berlin*

Prof. Dr Herbert Waldmann (Chairman)
*Max Planck Institute of Molecular Physiology,
Dortmund*

Managing Directors

Dr Stephan Formella (Science & Research), Marc Wittstock (Finance & Administration)
Schusterstrasse 46–48, 55116 Mainz, Germany, tel. +49 (0) 6131 27508-12, funding@bistiftung.de

Exploration Grants application guidelines

Applications for funding by the Exploration Grants programme can be submitted via the foundation's online application tool accessible via this [link](#).

The following information needs to be provided:

A: Information for the online application form

B: Required PDF documents to be uploaded

C: Project proposal – detailed guidelines

A: Information for the online application form

1. General information

1.1. Personal details

- Surname, first name, academic title
- Date of birth
- Nationality
- Degrees

1.2 Address of current place of work

- Institution and department/faculty (full name)
- Work address
- Phone number for contact
- Email address for contact

1.3 Current position and funding of your research group

- Official position
- Since when have you been leading your first independent research group (mm/yyyy)?
- Type of contract /duration: permanent/tenure-track/fixed-term (please specify incl. dates)
- Please state the resources and funding amounts (including personnel and non-personnel resources) that are available from the institution's annual budget or from a third party (please list separately) for the period covered by your proposal.
- Please state how your research group has been funded since its start: List the (1) resources and (2) funding amounts (including personnel and material resources) that your university/institution or a third party has committed to you in writing, as well as (3) their respective durations.

2. Information about the project

2.1. Title of project

2.2. Subject and area of research

- Subject (e.g., molecular biology, immunology)
- Area of research (e.g., DNA repair)

2.3. Proposed beginning and duration of funding

2.4. Summary

Please summarise the hypotheses and the main objectives of your proposed project in generally accessible language and in no more than 2,000 characters (incl. spaces).

2.5. Total funds requested

B: Required PDF documents to be uploaded

Please upload separate PDF files (each not larger than 2.5 MB) for each of the following sections:

1. Cover letter
2. Academic CV, including previously received awards, fellowships and research grants (do not list posters or oral presentations at scientific conferences)
3. Certificates (if not in English or German, include translation)
 - a. Doctoral degree
 - b. University degree(s) (MSc, Diploma or equivalent)
 - c. Additional degrees or certificates (if applicable)
4. Full list of publications and list of five most important publications
 - a. Numbered and in the eLife format ((including full list of authors, full paper title, journal title, volume, issue details, page range of article, and DOI)
 - b. List all your publications, distinctly indicating first- and last-authorships, and highlighting your five most important papers to date
 - c. Use separate sections for
 - i. original articles (published or accepted/in press)
 - ii. reviews
 - iii. manuscripts submitted or in revision (do not include manuscripts in preparation)
5. Five most important publications
 - a. Please submit each paper as a separate PDF file, each not larger than 2.5 MB, and all labelled according to the publication list
6. All submitted manuscripts, manuscripts in revision, papers currently in print or submitted for publication
 - a. Please submit each paper as a separate PDF file, each not larger than 2.5 MB, and all labelled according to the publication list
7. Project proposal for up to two years ([detailed guidelines below](#))
8. Declarations of applicants ([download link](#)). Please note that your application is only considered as complete once you sent the signed „declaration of applicants“ form to the following address: Boehringer Ingelheim Stiftung, Schusterstraße 46-48, 55116 Mainz
9. Employer's statement of the kind expected by the DFG for Emmy Noether group leaders assuring your independence
10. Cooperation agreements

C: Project proposal – detailed guidelines

The proposal – written in English – should be comprehensible without reading the cited or appended literature. The proposal should be uploaded as PDF file. Please adhere to the following order to facilitate the review process:

1. Information about the project

1.1. Title of project

1.2. Subject and area of research

- Subject (e.g., molecular biology, immunology)
- Area of research (e.g., DNA repair)

1.3. Proposed beginning and duration of funding

1.4. Summary

Please summarise the hypotheses and the main objectives of your proposed project in generally accessible language and in no more than 2,000 characters (incl. spaces).

1.5. Project outline

- 1.5.1.** Please describe the proposed project in no more than three pages of DIN A4 paper. Begin by describing the current state of knowledge concisely and exclusively in relation to your own research, mentioning the most significant work by other scientists. Please explain how your own work and preliminary studies to date fit into this context, citing the relevant literature. Indicate to which of the open issues in the field you will make a new contribution with the proposed project, and what importance, in your view, it will have for the field. Then, in the main section of your outline, describe the planned project.
- 1.5.2.** Make clear how this project represents, or might lead to a new line of research in your group and to what extent it differs from your previous and current work.
- 1.5.3.** Please explain why it cannot be undertaken as part of your ongoing work and/or with other means of support.

2. Funds requested

2.1. Total funds requested

Please state the total amount of funds requested.

2.2. Breakdown of costs

Please list the costs according to the funding period in a table.

2.2.1. Personnel expenses

Please specify:

- The number and type of positions (e.g., 1 PhD position, 65 % TVöD E13)
- The proposed periods of employment
- The requested amount of funding per position

Please provide justification of any substantial deviation from the DFG's standard rates.

2.2.2. Consumables

Please state the amount of funding you expect to need annually for consumables and provide justification of any substantial deviations from the DFG's standard rates.

3. References

Numbered and in the eLife format (including full list of authors, full paper title, journal title, volume, issue details, page range of article, and DOI)

4. Other information

4.1. Composition of the research group

Please list all members of your research group (names, academic titles, official positions, and funding source including fellowship holders) and highlight those who are to participate in the planned project (other than those named in section 2.2.1).

4.2. Conflicts of interest due to economic activities

Please inform us of any conflicts of interest e.g., if you are the owner of a commercial enterprise or own a stake in one. In each case, explain how your research project relates to the commercial enterprise's activities.

4.3. Applications submitted to others

Please list any other bodies to which you have submitted a funding application for the present research programme or any part thereof, stating the amount of funding requested.
